Equestrian Facility Flooring

Seamless Equine Flooring is used in breeding barns, veterinary clinics and zoos. It is an industry leader in safety and durability. The Pavesafe rubber pavers are manufactured by Ecore International previously Dodge-Regupol. They are used in the leading race tracks and thoroughbred farms.

They are a great accompaniment to the seamless flooring system. The stall mats are manufactured by Humane, one of the oldest rubber manufacturing companies in the United States. Their stall mats are rated extremely high with a 12 year warranty. It complements our high end list of flooring products for animals.

Seamless Textured Rubber Equine Systems

are a top of the line system which were originally designed for thoroughbreds, sport and performance horses. It's use has expanded to dog fitness areas and other areas where the safety and importance of your animal is stressed.

Humane Rubber Stall Mats are guaranteed for 12 years. Humane rubber mats do not curl up and cause you to hit the edge every time you muck out your stalls. When the rubber mats are installed correctly there are no gaps for debris to get in and to start the unraveling process many other mats have. Why buy inferior products? Humane has been around for decades.

Our Pavesafe Rubber Pavers provide long-lasting safety and comfort in many different equine and residential applications. Rubber pavers with 100% recycled rubber. Pavesafe rubber pavers are most frequently used in winner's circles, wash bays, breeding sheds, horse paths and sale venues. Rubber pavers are shock-absorbing, slip resistant pavers and also give decorative dimension and color to driveways, walking paths and patios.
